Trail Riders of the Canadian Rockies

BULLETIN No. 62

Judging by the letters that have come to the Secretary's office, the route selected for the Trail Ride of 1941 has a strong appeal not only for those who have never yet been to Mount Assiniboine but also for those old timers who wish to go there again and are intrigued by the prospect of approach by the old trail through White Man's Pass and the Spray Lakes. Mount Assiniboine is to the Canadian Rockies what the Matterhorn is to Switzerland, and as the Swiss Alps are unfortunately inaccessible to mountain lovers from North America in these strenuous days, the Canadian Rockies are likely to have a particular appeal this Summer. This Bulletin, therefore, is devoted to some geographical details which may help our readers to visualize the territory through which our trail will run.

According to Walter Dwight Wilcox, whose book on "The Rockies of Canada", published in 1900, is still the standard work on this territory, Mount Assiniboine was named by Dr. G. M. Dawson, director of the Geological Survey of Canada, who saw it from the White Man's Pass. Apart from Father de Smet, who passed by in 1845, the first white man to reach the base of the mountain was Mr. R. L. Barrett, who visited it in 1893 with Tom Wilson as his guide. Two years later Mr. Wilcox visited Mount Assiniboine with

Mr. Barrett by way of Healy Creek, the Simpson Pass and the Simpson Valley. It took them six days to reach Lake Magog at the foot of the mountain, of which he made the first complete circuit, a distance of 51 miles. In 1899, W. D. Wilcox made another expedition to Mount Assiniboine, in the course of which he traversed the valley now known as the Valley of the Rocks. Here follows his description:

"The whole place for three or four miles is a succession of weird hillocks of grey and whitish limestone of fantastic form

trophe of nature. Opposite the great pitch where the whole level of the valley suddenly rises nearly a thousand feet, and also opposite the little limestone lake, where the character of the country changes again, are notches in the mountain ridge to the north, and it appears as though a massive fragment of the mountain, three miles long and from three hundred to five hundred feet thick, had scaled off and fallen into the valley. Above this lake the valley is lined with meadows where deep streams

On Simpson Pass Summit

and outline. No springs or streams water this 'valley of the gnomes,' as we called it, though a struggling growth of small spruces adorns the place and takes away its barren aspect. Our spreading line of horses appeared very picturesque as they followed the winding trail, which makes many little turns, or sudden pitches and ascents, among these extraordinary mounds and copses.

"It seems to me that this strange valley has been made by a tremendous catas-

flow over beds of black gravel and then sink away and disappear. These waters probably pass under the broken masses of limestone only to reappear where the landslide ends."

Summing up his description of the great peak itself, Mr. Wilcox says:

"Mt. Assiniboine is the culminating point of a part of the mountains on the continental watershed. Five spurs reach out from the central peak and cover an area of about thirty square miles. Fourteen

or fifteen lakes, small and large, nestle around its immediate base and supply the waters of three rivers, the Simpson, the Cross and the Spray. Above two of the valleys the mountain rises abruptly six thousand feet, but above the one on the north the total ascent is only five thousand feet. Every side of this mountain is exceedingly steep, the east face being an absolute precipice, and the other two having slopes that average fifty degrees.

The first ascent of Mount Assiniboine was made in 1901 by Sir James Outram with two Swiss guides, Hasler and Bohren, the highest peak being reached in six hours.

"One at a time—the other two securely anchored—we crawled with the utmost caution to the actual highest point (an immense snow cornice) and peeped over the edge of the huge, overhanging crest, down the sheer wall to a great shining glacier 6000 feet or more below . . . Perched high upon our isolated pinnacle, fully 1500 feet above the loftiest peak for many miles around, below us

lay unfolded range after range of brown-grey mountains, patched with snow and sometimes glacier hung, intersected by deep chasms or broader wooded valleys. A dozen lakes were counted, nestling between the outlying ridges of our peak, which supply the head-waters of three rivers—the Cross, the Simpson and the Spray."

After resting on the Summit, it was decided to descend by another and even more difficult route, the steep north arete, the description of the descent being one of the most thrilling in Alpine history.

In 1920 the Alpine Club of Canada selected the foot of Mount Assiniboine as the site for its "Welcome Home Camp", so named in recognition of the fact that so many of its members had served in the Great War, such as Brigadier-General C. H. Mitchell, Colonel Bell of the Medical Service, and Lieut.-Col. W. W. Foster, who, it may be mentioned, was the first President of the Trail Riders of the Canadian Rockies. Twelve members of the Canadian Alpine Club made the supreme sacrifice in that war.

At this Camp, Mount Assiniboine was climbed by thirty-five members, including Harry Pollard, whose fine photograph of the mountain was reproduced in our last bulletin. The international interest in the mountain was shown by the presence in

camp of members of the English, Swiss and American Alpine Clubs, the B. C. Mountaineering Club, the Appalachian Mountain Club, the Mazamas, the Sierra Club, the Royal Geographical Society and the Royal Society.

PASSES ON THE TRAIL RIDE

On our Trail Ride this summer we shall traverse four well-travelled passes in the Canadian Rockies, all of which are described briefly in an interesting article on the "Passes of the Great Divide", contributed by Mr. A. O. Wheeler to the *Canadian Alpine Journal* of 1926-1927. Mr. Wheeler spent many years on the topographic survey of this territory, and at one time operated a string of camps in connection with walking tours which did much to make Mount Assiniboine known to lovers of the outdoors.

WHITE MAN PASS

"The summit lies at an altitude of 7,112 feet above sea level. Northward its waters by way of White Man Creek join Spray River and southward the waters of Cross River flow to the Kootenay. White Man Pass is the direct line of travel across the Main Range between the Bow and Columbia River valleys. The summit is a rocky open-tim-

bered ridge a mile long. At the apex it stands up a well-defined barrier of rock about a hundred feet wide and, in such respect, is quite distinct from the open, meadowland summits of the majority of major passes.

"The pass early became historical for in 1845 the Reverend Father J. P. DeSmet travelled from the Columbia River by way of this crossing to visit the Indians of the Bow River valley. At the Divide he erected a cross which he refers to as the "Cross of Peace" in his book, "Oregon Missions and Travels over the Rocky Mountains in 1845-6." The well-known guide and explorer of early days of Canadian Pacific Railway construction, Tom Wilson of Banff, stated to the writer that he had found at the summit of the pass what seemed to him to be relics of this cross. The mountain dominating the pass immediately northwest of the summit is a very distinct red mass and has, in consequence, been named Mt. Red Man while the

one on the opposite side of the depression, which is snow-clad, has been named Mt. White Man.

"When camped here, marking his boundary across the summit, Mr. Cautley had a most interesting experience; a fierce thunder storm, accompanied by a deluge of rain was in progress. He and his assistant had taken refuge in their tent. Suddenly came a vivid flash of lightning, instantly followed by a roar and blinding glare close by. Leaping out, they saw that a dry spruce tree within fifty feet had been struck by lightning and was seething skyward in a pillar of flame. It was very shortly extinguished by the torrents of rain, but it furnished a striking example of the way in which forest fires are started through natural causes. To one who travels much in the mountains it is a wonder how such fires have occurred in most unlikely places for human travel, and there is little room for doubt that lightning has been the agency. Indeed, while on the top of mountains, I have seen two such fires start from that cause.

ASSINIBOINE PASS

"The great massif of Mt. Assiniboine, 11,780 feet in altitude, rising a clear thousand feet above its group of attendant peaks, has always, since its discovery, held a special charm for mountaineers and Nature lovers, due to its spectacular combination of rock peak, glimmering icefield and the many gem-like lakes of varying shades of rich blue and green that surround it on all sides. The two routes from the east by which it is approached: Assiniboine Pass, with a summit altitude of 7152 feet and Wonder Pass, 7850 feet are both passes of the Great Divide.

There is one curious feature to which I should like to refer, viz: all the drainage from the icefield and glaciers of the north face of the Assiniboine Group flow to Lake Magog, a charming sheet of water at the base of the great massif. From this lake there is no surface outflow, although a stream of large size might be expected. It would be thought that the Simpson River valley, which trends northward parallel to the watershed would be the natural bed of such a stream, and yet for seven miles down this valley there is no distinct drainage flow. At that distance strong springs appear and,

from then on, the flow of Simpson River is of considerable volume. The valley bed for the greater part of this dry stretch is a wild confusion of piled up masses of rock of quaint form and great size, many of them weighing hundreds of tons. So wild and desolate is the rock-filled valley that it has been named the "Valley of the Rocks".

CITADEL PASS

"To travellers from the west, Citadel Pass is well remembered by visitors to Mt. Assiniboine by reason of the steep hill of 2000 feet which is a simple matter to descend but quite a different one when going in the opposite direction.

SIMPSON PASS

"The summit of Simpson Pass is at an altitude of 6914 feet. Northward the water flows to Bow River and southward to the Kootenay. The first recorded crossing was made by Sir George Simpson, Governor in Chief of the Hudson's Bay Company in 1841. His name and the date of his crossing were carved on a tree at the summit of the pass but are no longer to be seen, the tree having been cut down and the carving taken away. (Note—It is now in the possession of Jim Brewster.)

"The summit and vicinity is a beautiful alpine area with numerous gem-like lakes scattered amidst groves of golden larch, the whole dominated by the mass of Monarch Mountain. Some five miles from the summit down the valley of Healy Creek, the northern approach, is a remarkable occurrence: a sharp limestone peak on the south side of the valley rises, a great slab of rock. Two hundred feet below its crest there is a hole right through it, which is referred to by Sir George Simpson in the story of his travels as the "Hole in the Wall". Several years ago a party from the Alpine Club of Canada climbed to it and reported it to have a diameter of twenty to thirty feet. Seen from below it looks like a snowspot, but gazed at for a while the clouds may be seen sailing across it. On the north side of Bow River not far from Banff there is a cave in the mountain side which is pointed out to travellers as the "Hole in the Wall." There is a little doubt that the one on Healy Creek is that so designated by Sir George Simpson."
